318 Light Street
Baltimore 2, Maryland

Dear Mr. Rennie:

In conformance with Article 88C, Section 4, of the Annotated Code of Maryland (1951 Edition), I am pleased to transmit herewith, on behalf of the Commission, its recommendations for the 1958 Fiscal Year Capital Improvement Program.

As in past years, the Commission visited various institutions and held hearings for the purpose of establishing a clearer understanding of the programs and capital needs of the State's institutions and agencies. This practice has proved to be mutually helpful and will be continued.

Last year, for the first time, funds were recommended and later appropriated for the development of preliminary plans for major construction projects. In this connection, the 1956 General Assembly enacted legislation requiring the submission of such preliminary plans to that body at the time an appropriation for construction funds is requested. Accordingly, Commission recommendation of construction funds for major projects is subject to the availability of the preliminary plans at the time the proposed Bond Bill is introduced at the 1957 Session.

The Commission has given considerable thought to problems affecting the State's ability to finance the proposed capital improvements. It is believed the recommended program is within the safe limits in this regard, when considered along with the State's existing indebtedness.

We acknowledge with sincere thanks the splendid cooperation and assistance in the compilation of the program that we have had from you and your staff; Mr. James J. O'Donnell, Director, Department of Public Improvements; as well as from Mr. John S. Shriver, and Mrs. Janet Hoffman, of the Fiscal Research Bureau, and several representatives of the Legislative Council.

Again thanking you and your staff, I am

Sincerely yours,

A handwritten signature in cursive script, reading "James C. Alban", is written over a horizontal line.

James C. Alban
Chairman

CHAPTER I

FACTORS CONTROLLING THE SELECTION OF CAPITAL IMPROVEMENTS FOR THE 1958 FISCAL YEAR

Introduction

This edition is the eleventh Capital Improvement Program to be published by the Maryland State Planning Commission. The series was begun in 1941, and the reports were issued biennially through 1953. Since that time they have been published annually.

The decade and a half which has elapsed since the first report has seen many changes. The population has increased materially, the services provided by the State have expanded in many areas, the standards established for most activities have been placed at higher levels than previously existed, and many facilities have become outmoded or obsolete. Any one of these factors would call for capital improvements; together they have been responsible for the nature, magnitude and urgency of the programs which have been recommended.

The Maryland State Planning Commission, through the years, has followed the progress of the State's agencies, has studied their programs and their needs, and has given careful attention to the projects proposed whereby the functions of the agencies can best be accomplished.

Based on this background and study the Commission recommends to the Governor and State Legislature those projects which seem of the greatest urgency and importance to the citizens of the State. The necessary processing and coordination of the project requests, from which the Capital Improvement Program is compiled, is presented graphically in Figure 1 on the following page.

In the compilation of the program consideration has always been given to the financial aspects of the program and to the fiscal condition of the State. Care has always been exercised not to recommend a program of such magnitude that the issuance of the bonds necessary for the financing would impair the credit of

the State. A study made by the Planning Commission in 1953, "Management and Limits of the State Debt," explored the problem of safe margins for expanding the State debt and the findings have, since that time, served the Commission as a guide in establishing the magnitude of the program recommended.

Legislative Requirements

The General Assembly in 1952, 1953, 1954, and 1956 established conditions which direct the Commission in the preparation of a Capital Improvement Program. These requirements established by the legislative body are summarized below. Item 9 is the action taken at the 1956 Session.

1. The Maryland State Planning Commission shall prepare and keep up-to-date a long term development program.
2. All projects proposed for inclusion in a Capital Improvement Program must be submitted in proper form by the agency concerned to the Planning Commission by July 1 of each year.
3. The Commission must present its recommendations and program for capital improvement projects to the Director of the Budget by September 15 of each year.
4. Funds derived by issuance of general construction bonds must be used only for capital improvements.
5. A capital improvement, as defined in the bond bills, is a project the useful life of which shall be at least equal to the life of the bonds by which it is financed.
6. Unexpended funds which remain after a project is completed shall be applied to the reduction of the outstanding indebtedness of the State within one year after the acceptance of the project by the State.
7. Beginning with the General Construction Loan Act of 1954 and currently in effect, any authorized project not contracted for within two years from the effective date of the authorization shall be

deemed to have been abandoned. If bonds have already been issued from which proceeds an abandoned project was to have been financed, the funds specified for said project shall be transferred to the Annuity Bond Fund for debt service; or if bonds have not been issued for a project that is abandoned, then the total issuable bonds authorized shall be reduced by the amount specified for said abandoned project. Earlier limitations on getting projects underway were a four-year limit under the Construction Loan of 1953 and a five-year limit prior to that time.

8. No work shall begin on any project unless satisfactory assurances are made to the Board of Public Works that the project can be completed within the funds authorized.
9. During the 1956 Session, Section 8B of Article 15A of the Annotated Code of Maryland was enacted, requiring that at the time an appropriation for a permanent or long-time construction project is requested there shall be submitted to the General Assembly preliminary plans and outline specifications for the project.

In addition to the above requirements established by law, another highly significant action was taken during the 1956 Session. It merits special attention because of its fundamental import to capital improvement programming. In their Joint Report on the General Construction Program of 1956, the Senate Finance and the House Ways and Means Committees stated:

"The committees are firmly of the opinion that such items as picnic tables, minor equipment items and most repair work should be provided for in the operating State budget. It wishes to reiterate its position that the use of bond funds should not include items of a life of less than fifteen years and it believes also that many low cost items whose life may be more than fifteen years should be included in the operating budget.

It is very strongly of the opinion that all agencies and institutions should perform day-to-day preventive maintenance and should not allow their plants to become so run down that large amounts of loan money are required to restore them. The committees direct the State Planning Commission, the Department of Public Improvements and the Budget Director to adopt such rules and regulations as to implement these policies.

The committees also deplore the growing practice of department heads who seek to bypass the authority of the Planning Commission by bringing rejected items directly to the committee in an attempt to have them included in the current construction program. Wherever firm bids indicate that previously authorized improvements cannot be made within the sum appropriated for that purpose, the committees will always consider such a deficiency when recommended by the Director of the Department of Public Improvements. The committees do not intend, however, to write in additional items over the opposition of the Planning Commission, the Director of the Department of Public Improvements and the Budget Director."

Definition of Capital Improvement

The guiding principle in defining a capital improvement has been given in Item 5 in the preceding Section. Under the Maryland Constitution, the maximum permissible term for State bonds is fixed at 15 years. This constitutes the customary term for construction loans. This time period, therefore, establishes the minimum useful life of an improvement to be financed by borrowing and, as indicated, serves as the guiding principle to be followed in practice. Problems are encountered, nevertheless, in determining the expected life of various items, particularly with respect to equipment and furnishings, wherein many borderline cases arise.

In the interest of further delineating and clarifying what properly

constitutes a capital improvement as an aid to the operating agencies, completely revised Information and Instructions for Preparing Agency Project Requests were issued by the Commission this year for use in connection with the 1958 Capital Improvement Program. The information and instructions, as sent out to the agencies, are included in this report as Appendix II, and it is unnecessary, therefore, to discuss them in detail. In accordance therewith, maintenance and repair items, as well as initial supplies, are clearly to be excluded; and items costing less than \$5,000 should be scrutinized carefully to eliminate minor projects that could be financed out of operating funds.

When a project is submitted requesting equipment (other than "fixed" or "built-in" equipment) as well as furnishings, the agencies are required to submit a detailed breakdown of the items with their estimated costs. This part of the request is screened by the Department of Budget and Procurement to determine which items are to be assigned either to the capital budget or to the operating budget. This procedure aids in achieving uniformity in interpretation, serves as a check against the inclusion of items in both budgets simultaneously, and simplifies the agencies' task.

Procedure

The procedure followed in the compilation of the Capital Improvement Program has become somewhat standardized over the years. Currently, as has become the custom, two forms designed by the Commission are used for the submittal of proposed projects. Form A, Agency Project Request, gives detailed information on each individual project; and Form B, Summary of Agency Project Requests, serves to summarize the projects submitted by each institution and department.

Form A (see Figure 2) was revised this year in order to emphasize such factors as the estimated useful life of the project and the status of utilities required for the project, as well as to provide for the segregation of the cost of "fixed," or "built-in," equipment from other equipment sometimes

designated as "moveable" equipment. The form lists fifteen items for which information is requested. The nature of a number of them is obvious but attention should be directed to several which merit special consideration.

The project description is important. The information to be supplied should be sufficient to give a clear understanding of the size, capacity, function and nature of the project. This is essential if the Planning Commission is to have a documentary basis for evaluating the project as it relates to program and need of the institution and also as it compares to other projects within the same agency or from other agencies.

The priority as indicated by the submitting agencies in the order of listing receives careful attention. It is probable that the total requests received will require some selection and postponement, and the Commission is guided largely by the relative urgency, as expressed by the institution or agency when it becomes necessary to defer some projects to a later date. The urgency of need, as indicated by the relative priorities, determines to a large degree the time at which a project is recommended.

The cost is naturally of vital importance. The Commission requires that all of the estimates submitted by the agencies have to be approved by the Department of Public Improvements. The restricting legislation which prohibits undertaking a project when the amount approved turns out to be less than the price bid can result in undesirable delay. On the other hand, estimates that prove unrealistically high would result in fewer projects being recommended in any one year and hence cause undesirable delay for others.

The effect on the annual operating and maintenance budget should not be overlooked. Generally, an increase can be expected. New facilities will require additions to the operating staffs and increased maintenance expense. While not common, occasionally the replacement of an obsolete facility may be recorded as permitting a decrease in the budget for that particular operation.

The justification for the project becomes most significant. In order that it be effective, study must be directed to the present and projected institutional program, policies, population trends, accepted standards, scope of operation, and the relation of the project in question with the many others proposed. An exhaustive review of this nature has value far beyond that represented by a single project. It is an evaluation of these factors that enables an agency to achieve and remain at maximum effectiveness. An analysis by the Maryland State Planning Commission of the justifications of the projects is a part of the machinery of selection by which the final recommendations are determined.

Form B (see Figure 2) gives a summation of all the individual projects discussed at length on Form A. As a matter of convenience, it gives at a glance the items and magnitude of the improvement program proposed by each agency.

The program so listed will, with rare exceptions, be greater than could reasonably be undertaken in the immediate future.

This is to be expected. Each agency has been instructed to plan for the future, and a proper Long-Term Capital Improvement Program must logically provide for conditions which will develop in the future. Only by this procedure is it possible to grasp the magnitude of the problems which, some day, the State must face. Only by this type of planning can the fiscal problems to be met be best understood and anticipated.

There is no thought on the part of anyone that the program as submitted could possibly be undertaken within a single fiscal year. It is understood that from the long-term program, the Planning Commission, guided by the information submitted and in conference with the agencies represented in the program and with the State officials responsible for the engineering and financial aspects of the over-all program, selects and recommends projects for immediate construction which will best serve the interest of the State.

FIGURE 3

**MARYLAND STATE PLANNING COMMISSION
LONG-TERM CAPITAL IMPROVEMENT PROGRAM**

[illegible]

Long-Range Programming (Master Plan)

It is impossible to lay too great emphasis upon the importance of long-range programming. The inception of the projects submitted lies primarily with the agencies. However, as part of the whole planning process, the projects should stem from an orderly development of needs as determined on the basis of a long-range program. The Commission has consistently urged this. Long-range programming involves periodic review of the current and projected needs based upon a foresighted look into the future. Its purpose is to establish objectives; to analyze emerging problems and changing conditions; to develop plans and programs of action to meet the problems; and to determine current and future improvements to appropriately meet the needs. All this should be formalized in documentary form, which then becomes the master development plan for a department or an institution. This long-range development program requires periodic review so that it may be adjusted as changing conditions and needs may dictate.

Such comprehensive information, which the Commission has requested and continues to seek of the departments with regularity, provides the basis for an understanding and evaluation of the program and needs of a department so essential to the task of coordinating the various departmental programs in terms of the total needs and resources of the State. Experience indicates the need for a strengthening of long-range programming on the part of the operating agencies, and the Commission intends to continue vigorously its efforts to bring about further improvement in this essential departmental function.

Such long-range programming will also give administrative and legislative bodies an early opportunity to dispose of excess, burdening land responsibilities, enabling the return of unneeded land to private hands where it may become productive once more. Or, such planning may point to the need for early land acquisition upon which facilities may be extended at less cost.

Selection of Projects

It is not a simple task to compile a recommended program from the great number of projects submitted. Some are fairly obvious; for example, the replacement of a boiler which is dangerously obsolete cannot be questioned. Others which may require a selection between the expansion of a bathing beach and the renovation of a building now in use are more difficult to make. Each is a needed item and, to the agency making the request, each is important. The complete functioning of the State in its responsibilities to its citizens requires all of the agencies and none can be neglected without impairing the over-all operations of the State and working a hardship on some of its citizens. For this reason, the Planning Commission is especially careful to see that no aspect of State operation is neglected and that a well rounded program which recognizes all of the many facets is recommended.

In general, a high priority is placed on projects relating to health and safety. For example, the provision of proper drinking water and sanitary facilities is given priority over such items as parking, more acreage, or pic-nicking equipment. Similarly, projects relating to fire protection are rated highly. Once these safety requirements are met, other projects which may temporarily be deferred may find themselves in the recommended program. In the listing of each recommended project, there is an accompanying statement reflecting the reason for its inclusion.

Committee on Medical Care

The Committee on Medical Care has continued its valued services. Many outstanding medical problems of the State have been reviewed, and courses of action recommended. The willingness of these able medical authorities to give their time and careful study to the requests and to inspect conditions needing attention has been of inestimable value to the Commission. The advisory help furnished to the Commission in this program has been deeply appreciated. In some cases, it was the determining factor in the selection of the projects.

CHAPTER II

MAGNITUDE OF PROGRAM AND STATE DEBT

Owing to the cessation of construction during the war years and the rapidly increasing population which followed, a period of Statewide construction was launched which was of impressive magnitude both in number of projects and in cost. In the ten-year period, 1947-1956, more than \$150,000,000 in capital improvement expenditures were authorized. As a consequence, the critical urgency of facilities experienced has been somewhat lessened.

The following table shows a comparison between the dollar value of the total projects submitted, the projects classified as "urgent," and the recommended program for four fiscal periods:

	Fiscal Years			
	1955	1956	1957	1958
Total Submitted Program	67,794,890	63,368,875	64,304,707	66,452,452
Projects Classified Urgent	45,462,305	39,924,076	30,402,168	28,864,397
Recommended Program	9,995,000	9,698,300	8,338,067	13,545,800

These figures indicate that the urgency of many projects presented in the past has been met to an appreciable degree, since the decline in urgent projects has continued despite little change in the total projects submitted. This would suggest, as has been urged, that planning for the future is receiving an increasing amount of attention.

The "urgent" projects, understandably, are the primary concern of the Commission in making its recommendations. These are the needs which, if neglected, may in a few years become major problems. It is the aim of the Commission to include as many urgent projects as possible. Those listed as less than urgent are also important. They recognize the impact of increasing population and services, and they forecast what can be estimated as the future needs which must be met.

Financial Status of State

The report by the Comptroller of the Treasury June 30, 1956 designated "Balance Sheet and other Financial Information," shows that at the end of the fiscal year the State debt was \$169,744,000. Of this amount approximately \$63,000,000 represent bonds issued under the General Public School Construction Loans of 1949 and 1953 (\$70,000,000 were authorized), the principal and interest of which are paid by the local subdivisions. Additional bonds to aid school construction, in the amount of \$75,000,000 were authorized by the General Assembly at the 1956 Session.

All the bonds authorized by the General Assembly have not been issued. Unissued bonds at the end of the 1956 fiscal year were:

General Construction Loan of 1956	\$ 8,550,167
General Construction Loan of 1955	9,195,750
State Office Building Loan of 1956	5,585,000
State Office Building Loan of 1954	2,000,000
General Public School Construction Loan of 1956	75,000,000
General Public School Construction Loan of 1953	6,738,000
St. John's College Loan of 1956	<u>500,000</u>
TOTAL	\$107,568,917

(Note:- On October 23, 1956, the State sold various improvement bonds in the amount of \$8,688,000, at a net interest cost of 2.55 per cent. Taking into account bonds maturing from July 1 to November 1, 1956, the outstanding debt on November 1, 1956 was \$176,339,000. The net interest cost of 2.55 per cent is to be compared to the figure of 1.95 per cent which was obtained at the time of the immediately preceding bond sale on January 31, 1956).

It is pertinent to include here the actual and estimated assessed value of real and personal property subject to State tax, which is as follows:

1955 taxable year	=	\$6,189,898,996
1956 taxable year (estimated)	=	\$6,977,000,000
1957 taxable year (estimated)	=	\$7,521,000,000
1958 taxable year (estimated)	=	\$7,854,000,000

It is also to be noted that the funds to be derived from the sale of the unissued bonds authorized in the General Construction Loans of 1955 and 1956

are completely earmarked for specific projects already recommended by the Commission and approved by the Governor and the General Assembly. Hence, none of the funds from those loans are available for projects included in the current problem.

Fiscal Considerations Regarding State Debt

Financial authorities have for some time classified the credit rating of governmental units as triple A, double A, and so on. Beginning with triple A as the highest, the designation indicates the soundness of the fiscal policies of such units, and the apparent safety with which their bonds may be held as investments. The highest possible credit rating is always desirable for it enables a governmental unit to borrow funds at the lowest interest cost.

It is not possible to establish any incontrovertible figure as the limit for the State debt beyond which its credit would be seriously impaired. The ability and willingness of the public to pay taxes, the increase in population and assessable base, and the nature of the tax structure are all factors which influence the permissible size of the debt. The absence of a firm figure does not change the fact, however, that somewhere there is a limit beyond which it is not safe to go.

The importance of the financial aspect of the Capital Improvement Programs has been recognized from the beginning. In 1953 the Commission published a report, "Management and Limits of the State Debt," which contained the following words of caution:

"In the absence of additional sources of revenue for debt service, however, the rate of growth of the State debt established in recent years cannot persist into the indefinite future without either affecting adversely the State's credit or alternately causing a burdensome increase in the property tax rate. This fact lends support to the Commission's previous recommendation that serious consideration be given to placing capital improvement expenditures on at least a partial pay-as-you-go basis."

Out of this report there grew the conviction on the part of the Commission that, on the average, about \$10,000,000 was the maximum that the State should borrow in any one year. Since the publication of that report, the Commission has kept its recommended programs to an average below this figure.

In addition to the report on the State Debt, the Commission also published in November 1954 a report, "A Program for Partial Pay-As-You-Go Financing," which contained suggestions for the adoption of a partial pay-as-you-go policy. To the degree that the Capital Improvement Program can be financed from current revenue the necessity of borrowing is diminished. This would check the growth in the State debt and reduce the proportion of the future revenues required for debt service. For many years the Commission has pointed out the value of such a policy recommending in 1954 that "the amount of current revenue appropriated to capital improvements each year be fixed at two (2) per cent of the average annual revenue of the State during the preceding five-year period."

In 1955 a special Committee on Taxation and Fiscal Matters of the Legislative Council commented on the need of stabilizing the rate of the State property tax with the following:

"This goal can be accomplished by holding the State's Capital Improvement Programs within rather severe bounds or, more realistically, by launching a long overdue program of partial pay-as-you-go financing of the capital improvements."

In the 1956 report of this Committee, endorsement was given to a number of "basic principles of sound fiscal arrangement." Among them, three have the most direct bearing upon the financing of capital improvements:

1. Bonds should only be issued to cover such items as the purchase of land and erection of buildings.
2. Nonrecurring revenues should only be used for such nonrecurring expenditures as capital improvements.

3. Accumulated surplus, beyond a needed reserve, should be used to prevent increasing the State's debt.

Further study should be given these proposals in contrast to, in lieu of, or in addition to a more direct and positive method of achieving partial pay-as-you-go financing of capital improvements.

CHAPTER III

VISITS TO INSTITUTIONS

For four years now the Planning Commission has, each year, visited a selected group of State institutions. Three years are required, under the schedule adopted, to cover all of the institutions. Therefore this year the institutions first visited were revisited.

Projects which have been completed in the interior were inspected, existing conditions examined, and the nature and urgency of new proposals evaluated. The information and understanding thus developed aided materially in determining the items to be included in the recommended program.

The schedule of visits in 1956 was as follows:

May 31	Coppin State Teachers College Maryland Training School for Boys Morgan State College
June 5	Boys' Village of Maryland Crownsville State Hospital Barrett School for Girls
June 14	Bowie State Teachers College Rosewood State Training School Montrose School for Girls
June 19	Salisbury State Teachers College Eastern Shore State Hospital
June 28	Towson State Teachers College Spring Grove State Hospital Springfield State Hospital

The group making the visits always included members of the Commission, the staff, and representatives of the Department of Public Improvements and the Department of Budget and Procurement. On occasions members of the State Legislature joined in the inspection trips and benefitted, as did the others, by the first hand information and examination the trips made possible. The visits are now an established policy.

CHAPTER III

VISITS TO INSTITUTIONS

For four years now the Planning Commission has, each year, visited a selected group of State institutions. Three years are required, under the schedule adopted, to cover all of the institutions. Therefore this year the institutions first visited were revisited.

Projects which have been completed in the interior were inspected, existing conditions examined, and the nature and urgency of new proposals evaluated. The information and understanding thus developed aided materially in determining the items to be included in the recommended program.

The schedule of visits in 1956 was as follows:

May 31	Coppin State Teachers College Maryland Training School for Boys Morgan State College
June 5	Boys' Village of Maryland Crownsville State Hospital Barrett School for Girls
June 14	Bowie State Teachers College Rosewood State Training School Montrose School for Girls
June 19	Salisbury State Teachers College Eastern Shore State Hospital
June 28	Towson State Teachers College Spring Grove State Hospital Springfield State Hospital

The group making the visits always included members of the Commission, the staff, and representatives of the Department of Public Improvements and the Department of Budget and Procurement. On occasions members of the State Legislature joined in the inspection trips and benefitted, as did the others, by the first hand information and examination the trips made possible. The visits are now an established policy.

CHAPTER IV
HEARINGS BEFORE THE COMMISSION

As has been stated, the visits made in any year will roughly include a third of the agencies or subunits. In order that all agencies shall have an opportunity to present their project requests, the visits are supplemented by hearings before the Commission. The hearings, which occupy the entire day, were held in accordance with the following schedule:

July 18	State Department of Public Welfare Morgan State College State Department of Education
July 23	Department of Mental Hygiene Maryland State Police University of Maryland
July 26	Department of Correction Maryland State School for the Deaf Department of Forests and Parks

The representatives of the agencies discussed each project in their submitted program. The effect of population growth, the improvement of standards and services, the problems of maintenance and operation, the inadequacies and deficiencies of facilities were studied in relation to the requests and as a guide in the selection of projects. From the beginning, it was obvious that all projects listed by the submitting agencies as urgent could not possibly be undertaken in one year and some deletion would be compulsory. In making the deletions the agencies themselves were requested to indicate those projects the postponement of which would cause least relative hardship to the institution.

The hearings, even though lengthy, were of great value to the Commission in compiling the recommended program.

CHAPTER V

COMMISSION MEETINGS

At the conclusion of the hearings several weeks are required to tabulate the requests, to assemble all the supporting data, and to arrange tentative priorities for Commission study, revision and acceptance. With this material on hand the Commission meets for consideration of and action upon the proposed projects. For the current program lengthy meetings were held on August 30 and September 10, 1956. A careful and detailed analysis of each program submitted was made and each was discussed, project by project. For the most part the relative priorities assigned by the submitting agencies were accepted although on occasion the influence of other programs, the intimate knowledge of the Department of Public Improvements regarding technical problems, and the need for legislative or administrative action compelled the Planning Commission to revise the relative priority of a project.

In every case the estimated cost of the project was held open for verification by the Department of Public Improvements. No project is considered as having complete approval of the Commission until this Department is satisfied that the amount listed will be adequate for the complete cost, including technical fees.

Moreover, in accordance with the legislation adopted during the 1956 Session requiring submission of preliminary plans at the time construction funds are requested, approval of several major construction projects was given subject to the availability of preliminary plans to meet the legislative requirement.

Recommendations and Policies Adopted

I. Advance Planning Funds

In recognition of the need for more adequate preliminary planning in connection with sizeable building projects, the Commission last year adopted

a general policy of first recommending funds for the preparation of preliminary plans and specifications for such projects, before recommending that construction funds be provided. The objective was to provide a sounder base for project approval, as well as for estimating construction costs. This procedure has come to be referred to as providing "advance planning funds". In recommending such funds the Commission gives evidence that it has been convinced of the need of the proposed structure; but through the development of preliminary plans and specifications, it is strongly felt that a more economical expenditure of State funds will result.

In line with this policy, advance planning funds were provided in the General Construction Loan of 1956 for 10 major projects. Four of these were added to the bond bill by the General Assembly. Table 1 herewith lists the 10 projects and shows the potential construction fund requirements created by the provision of funds for the preparation of preliminary plans and specifications. It is to be noted that these projects alone would call for a 1958 Capital Improvement Program in excess of \$11,500,000, without giving any consideration to new projects submitted by the State agencies for the current program. As a matter of fact, however, three of the 10 projects have had to be deferred because preliminary plans are and will not be available. Therefore the actual effect on the 1958 Program was to start off with tentative commitments totalling \$6,360,000 prior to considering current projects requests.

In the whole array of projects included in the recommended 1958 Capital Improvement Program, those for which preliminary plans have been developed should be scrutinized most carefully by the General Assembly. The preliminary plans, as required by legislation enacted in the 1956 session, are contained in a Supplement to this report. Careful review of such plans in terms of the function and layout is essential at this time as the means of avoiding omissions or the inclusion of things which the legislature does not

want included. The time for such review is prior to the appropriation of construction funds and the Commission urges the raising of questions in advance thereof.

Table 1

Construction Fund Requirements Tentatively Created By
Provision of Advance Planning Funds in the
General Construction Loan of 1956

<u>Agency and Project</u>	<u>Advance Planning Funds Provided in 1956 Loan Act</u>	<u>Estimated Project Cost</u>
State Department of Public Welfare: Staff dormitory, Boys' Village	\$ 2,750	\$ 240,000
Department of Correction: Diagnostic Center, Patuxent Institution	20,000	2,250,000
Morgan State College: Auditorium, Music-Arts Building	13,000	1,000,000
State Department of Education: Library, Bowie State Teachers College ^{1/}	5,500	300,000
Laboratory School, Frostburg State Teachers College ^{1/}	7,000	600,000
Laboratory School, Towson State Teachers College ^{1/} *	7,000	700,000
Auditorium-gymnasium, Coppin State Teachers College ^{1/}	7,000	470,000
University of Maryland: College of Business and classroom building	20,000	1,500,000
Department of Mental Hygiene: Continued treatment building, Crownsville*	20,000	2,000,000
Department of Motor Vehicles: Headquarters Building*	<u>30,000</u>	<u>2,500,000</u>
Total	\$132,250	\$11,560,000

^{1/} These projects were added to the loan act by the General Assembly.

* These projects have been deferred; preliminary plans are not available for reasons given under each project as listed in Appendix III.

Table 2 which follows lists six new projects for which advance planning funds are recommended in the 1958 Capital Improvement Program, and

indicates that the 1959 Program potentially will include \$3,652,000 for construction of these projects. While it does not necessarily hold that construction funds will inevitably be recommended in the year immediately following the provision of advance planning funds, there exists that potential commitment in so far as construction funds are concerned.

Table 2

Construction Fund Requirements Tentatively Created By
Advance Planning Funds Recommended in
1958 Capital Improvement Program

<u>Agency and Project</u>	<u>Advance Planning Funds Recommended in 1958 Program</u>	<u>Estimated Project Cost</u>
Department of Mental Hygiene:		
Geriatrics building, Eastern Shore State Hospital	\$ 14,000	\$ 966,000
Active treatment building, Spring Grove State Hospital	14,000	1,044,000
Administration building, Spring Grove State Hospital	1,500	102,000
State Department of Public Welfare:		
Academic building, Boys' Village	3,500	256,000
Department of Correction:		
Central laundry, Headquarters	10,000	900,000
State Department of Education:		
Gymnasium, Salisbury State Teachers College	<u>6,000</u>	<u>384,000</u>
Total	\$ 49,000	\$3,652,000

In furtherance of the policy of providing advance planning funds, the Commission, during its deliberations this past summer, extended its policy in this regard. Owing to the fact that an appropriation to develop preliminary plans does not become available until June 1, following the legislative enactment, such plans not infrequently are not available at the time the Commission must make its recommendations. Thus the Commission is still not as fully informed as it should be. Consequently, the Commission adopted the policy that in the future it would not recommend construction funds for projects costing

in excess of \$250,000 unless preliminary plans for the project were submitted to the Commission prior to its having to submit its recommended program to the Budget Director on September 15, as required by law.

II. Employee Housing

Based upon the findings of an extensive study of the employee housing problem and needs, the Commission has adopted a policy on employee housing as follows:

- "1. Staff housing shall be provided solely on the basis of maximum security needs and/or essential operation.
2. An individual residence shall be provided only for the superintendent or other designated head of an institution.
3. The cost of an individual residence, exclusive of land and utilities, should not exceed \$25,000, on the basis of today's market.
4. Other types of employee housing accommodations shall be restricted to apartments or group houses (one-, two- or three-bedroom units) and to dormitory rooms (single occupancy).
5. The cost of an apartment or a group house should be approximately \$10,000 per unit, varied in accordance with the number of bedrooms, and the cost of employee dormitory rooms should be approximately \$5,000 per unit, both figures exclusive of land and utility costs and on the basis of today's market.
6. Furnishings shall be provided only in the case of dormitories.

It is realized that no completely rigid, irrevocable policy can be established, however the Commission feels that the policy outlined above is a good beginning and should be adhered to as firmly as conditions may permit, and departures therefrom only to be made as result of emergency or most extenuating circumstances."

III. Property Surveys

A review of property survey records maintained by the Department of Public Improvements disclosed that such surveys are not available for all existing State properties and that record drawings are not up to date. In order that such fundamental data be fully available, the Commission requested the department to advise for which institutions property surveys are lacking and to submit an estimate of the cost to complete the property surveys and to bring record

drawings up to date. The Department of Public Improvements advised that \$10,000 would be required to accomplish this. The Commission recommends that this task be undertaken, and this project is included in the recommended 1958 Capital Improvement Program.

IV. Management Study, Department of Motor Vehicles

During the year, a special subcommittee of the State Planning Commission was appointed to work with the Department of Motor Vehicles with respect to the planning and development of the new Headquarters building for the department. Among the important conclusions arrived at by the subcommittee were:

1. That it is feasible to separate the administration of the Department of Motor Vehicles, as a whole, from the test driving functions of the department.
2. That the administrative facilities should, if possible, be located in Redevelopment Area 12, or a similar area.
3. That a management study be undertaken to determine whether the methods of operation of the department are most efficient and, if not, to propose necessary changes in the methods prior to attempting to design a building for the future use of the department.

The subcommittee strongly recommends that a study of the administrative operations and procedures of the Department of Motor Vehicles be initiated by a competent management consultant group to develop basic information needed for the determination of space needs and the most efficient layout thereof, as well as the utilization of the most modern record keeping equipment. In this connection it has been suggested that assistance in this study might be obtained from some of the large corporations with headquarters in Baltimore which have record keeping and administrative operations of similar magnitude and character.

Recommended Program

The 1958 Fiscal Year Capital Improvement Program as recommended by the Commission to the Budget Director is presented in detail in Chapter VI which follows. A summary of the recommended program by departments is shown in Table 3 below. The policy, established two years ago, of giving a general description of the project, a breakdown of the cost involved, and an explanatory statement regarding the selection of the project has been maintained. This procedure has proved its value. Wherever estimates were available concerning the effect of the project on the operating budget, this information has been included.

Table 3

Summary of Recommended 1958 Capital Improvement Program By Departments

<u>Agency</u>	<u>Recommended Program Total</u>	<u>Per Cent of Total</u>
Board of Public Works	\$ 35,500	0.3
Military Department	150,000	1.1
Department of Maryland State Police	249,400	1.8
Board of Natural Resources		
Department of Forests and Parks	\$652,500	
Department of Research and Education	<u>44,200</u>	
Total	696,700	5.1
State Department of Health	100,000	0.7
Department of Mental Hygiene	956,000	7.1
State Department of Public Welfare	645,400	4.8
Department of Correction	3,661,500	27.0
Maryland State School for the Deaf	47,600	0.4
Morgan State College	1,364,900	10.1
State Department of Education	1,705,000	12.6
University of Maryland		
College Park	\$3,608,800	
Baltimore	178,000	
Princess Anne	<u>147,000</u>	
Total	<u>3,933,800</u>	<u>29.0</u>
TOTAL RECOMMENDED PROGRAM	\$13,545,800	100.0

Institutional population charts, showing the changes since 1950, are presented in Appendix I of this report. Appendix II presents Information and Instructions For Preparing Agency Project Requests, which material was distributed to all State agencies having proposed capital improvement projects.

In addition to the recommended program the Commission has in Appendix III, given the remaining projects which had been classified "urgent" by the agencies but which were not recommended. The reasons are given for the deferment. The fundamental reason for deferment is the necessity of keeping the grand total within a safe limit. The Commission has established the limit, on the average, of \$10,000,000 per year. Individual projects were then selected, usually in conference with the submitting agency, on the basis of accepted priority although in some cases the need for further delineation or clarification of proposals, policy determination, magnitude of work already approved or underway, and the interdependence of projects may have prompted the action of the Commission.

Appendix IV concludes the tabulation of submitted projects. It is this material, amounting to \$39,786,300, which gives the report its long-range aspect. Here will be found projects that may not be undertaken for many years. No attempt is made to predict any timing for the projects not recommended in the current program. Some will be found in next years' recommended list, others may not be classified with this degree of urgency until some years have elapsed. They are important, however, in that they indicate what future requirements will be, as they are envisaged today. They do indicate the magnitude of expenditure for which the State must be prepared. And finally, they point out in no unmistakable manner that Maryland, while it has an admirable record of accomplishment, has still a great deal more ahead.

The Supplement to this report, which is published as a separate document, presents the preliminary plans and outlines specifications of the building projects recommended. These are furnished in accordance with the new legislation requiring submittal of this information to the General Assembly at the time an appropriation is requested for construction. The plans and project data show the size of the structure, the functions provided for, the type of construction, and the layout.

CHAPTER VI

MARYLAND STATE PLANNING COMMISSION
RECOMMENDED 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Agency</u>	<u>Amount</u>	<u>Operation and Maintenance</u>	<u>Additional Staff</u>
BOARD OF PUBLIC WORKS			
06.03.00.02-1 - Installation of air conditioning in Court Room, Office of the Clerk, Conference Room, and State Library in Court of Appeals Building	\$ 25,500	-	-
<p>The Office of the Clerk of the Court of Appeals must be open the year round; moreover, sessions of the Court of Appeals now carry well into July and occasionally into August. Working conditions in the Clerk's office, the Court Room and the Conference Room become very unpleasant during the hot summer months because of the orientation of these facilities. Similarly, working conditions in the State Library are unpleasant for the users and the staff. Air conditioning of these facilities as proposed would be conducive to greater efficiency of operation through improved working conditions, as well as of significant value to the Library in the better preservation of books and other materials. This project is recommended by the Commission as an aid toward these ends.</p>			
06.03.00.02-2 - To Department of Public Improvements for necessary expenses incident to continuing survey of existing State property and bringing record drawings up to date	10,000	-	-
<p>Property surveys of a number of State-owned properties do not exist, and in other instances record drawings are outdated. The Commission recommends this project in order to continue the surveys of existing State property so that a complete set of plats, as well as up-to-date record drawings, will be available.</p>			
TOTAL - BOARD OF PUBLIC WORKS	\$ 35,500	-	-

RECOMMENDED 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Agency</u>	<u>Amount</u>	<u>Operation and Maintenance</u>	<u>Additional Staff</u>
---------------	---------------	--	-----------------------------

MILITARY DEPARTMENT

07.03.00.03-1 - Grading, curbs, roads, parking areas and other improvements at the following Armory locations throughout the State: Cambridge, Centerville, Frostburg, Glen Burnie, Havre de Grace, Highfield, Hyattsville, Kensington, LaPlata, Laurel, Leonardtown, Baltimore area, Prince Frederick, Silver Spring	\$ 150,000	-	-
---	------------	---	---

This project will permit improvements at the 14 armories listed which will increase their usefulness and service to the department and to the communities. Under existing federal regulations, federal funds cannot be expended upon improvements of this nature, and they must be provided out of State funds. The Commission recommends the item, calling attention to the fact that there will be an estimated unexpended balance of \$150,000 from the \$250,000 appropriation to the Military Department in the General Construction Loan of 1956 for improvements at the Martin airfield, which, under the terms of the loan act, will subsequently be transferred to the Annuity Bond Fund. The estimated balance is the result of greater federal participation in the cost of the facilities undertaken by the State at Martin airfield, and might be considered as an offset to this item.

TOTAL - MILITARY DEPARTMENT	\$ 150,000	-	-
-----------------------------	------------	---	---

DEPARTMENT OF MARYLAND STATE POLICE

New Barracks replacing Conowingo Barracks

07.05.00.03-1 - Acquisition of land on, or within close proximity of, either U.S. 40 or the Northeastern Expressway, between Perryville and Elkton	\$ 7,700	\$ -	-
Construction of barracks	170,000	1,000	-
Equipment for new barracks	4,200	-	-

The barracks at Conowingo are not owned by the State, are totally

RECOMMENDED 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Agency</u>	<u>Amount</u>	<u>Operation and Maintenance</u>	<u>Additional Staff</u>
---------------	---------------	--	-----------------------------

DEPARTMENT OF MARYLAND STATE POLICE (Continued)

New Barracks replacing Conowingo
Barracks (Continued)

inadequate and obsolete in terms of capacity and modern standards, and are located poorly with respect to the major travel in the area. The Commission recommends the construction of new barracks similar to those erected elsewhere in the State. The exact site is not determined, but the new facility should be located so as to serve efficiently both the existing U.S. 40 and the proposed Northeastern Expressway. The amount approved includes the cost of adequate sanitary sewerage facilities.

Total - New Barracks replacing Conowingo Barracks	\$ 181,900	\$ 1,000	-
---	------------	----------	---

Waterloo Barracks

07.05.00.03-3 - Sewage disposal system	\$ 20,000	\$ -	-
--	-----------	------	---

For over a decade the disposal of sewage at this location has resulted in an unsatisfactory health condition. The State Department of Health has urged that changes be made in the present sewage disposal system to correct this condition. The Planning Commission recommends the project in the interest of safety and health, feeling that in these respects the State should set an example employing best practice.

07.05.00.07-4 - Construction of radio repair shop	47,500	400	-
---	--------	-----	---

This building, with the same dimensions as the new barrack garages, i.e., 38'x57', will permit the Radio Division to have a separate location in which their entire operation can be assembled thus making for greater efficiency. In addition, it will permit the reorganization

RECOMMENDED 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Agency</u>	<u>Amount</u>	<u>Operation and Maintenance</u>	<u>Additional Staff</u>
---------------	---------------	--	-----------------------------

DEPARTMENT OF MARYLAND STATE POLICE (Continued)

Waterloo Barracks (Continued)

of the existing kitchen facilities, enabling their removal to the basement (as in the new barracks) now occupied by the Radio Division. This will provide additional essential office space on the first floor. The Commission recommends the project as a measure for improving the operation of the barracks.

Total - Waterloo Barracks	\$ 67,500	\$ 400	-
TOTAL - DEPARTMENT OF MARYLAND STATE POLICE	\$ 249,400	\$ 1,400	-

BOARD OF NATURAL RESOURCES

DEPARTMENT OF FORESTS AND PARKS

Bishopville Recreation Area

09.04.00.08-1B - Construction of dam across branch of St. Martin's River replacing old dam

\$ 25,000	-	-
-----------	---	---

At a point where State Route 367 crosses a branch of the St. Martin's River near Bishopville, the State some years ago constructed a bridge across a mill pond created by a dam on the stream at this point. The dam was destroyed by the construction of the bridge and, as a consequence, the flow of the river has become irregular and the former mill pond has developed into an undesirable large swampy area. By reconstruction of the dam the flow of the water can be controlled and the swampy area eradicated, creating a scenic picnic area alongside the refilled pond. The Planning Commission recommends the project in the interest of providing an attractive recreation spot in this area.

Total - Bishopville Recreation Area	\$ 25,000	-	-
-------------------------------------	-----------	---	---

<u>Patapsco State Park</u>			

09.04.00.06-1 - Land acquisition	\$ 310,000	\$ -	-
----------------------------------	------------	------	---

The program of land acquisition for the Patapsco State Park has extended over five years. During this time, in addition to purchasing land, extensive funds have been expended to develop park and recreational facilities, as the land became available, to enable the public to enjoy the park. The Master Plan called for the acquisition of 8,535 acres. To date, 2,191 acres have been purchased. These added to the 1,564 acres originally owned by the State total 3,755 acres. In addition to these, there were 700 acres proposed for purchase which have been abandoned since they were required for the harbor crossing right-of-way. Hence, this acreage has been removed from the Master Plan. The current proposal, which is recommended by the Planning Commission, is for the further acquisition of 3,155 acres. There is available for this purpose approximately \$314,000, leaving additional funds in the amount of \$310,000 required for the costs of land, surveys, appraisals and titles. There still remains 925 acres which are subject to further study. Whatever may be recommended for acquisition as a result of the study would require additional funds.

09.04.00.06-35A - Provision of bridle paths	5,000	-	-
---	-------	---	---

The Department reports a heavy demand for trails to provide circulation for horsemen through the park. The Master Plan envisions an extensive network of horse trails. Those proposed by this request are recommended by the Commission as a part of the total Master Plan.

STATE DEPARTMENT OF HEALTH (Continued)

Division of Hospitals (Continued)

view of the need for additional nursing home beds in Maryland, as disclosed by the recent study "Medical Facilities, Survey and Plan 1954-1955," published by the Maryland State Planning Commission, the State Health Department and the Commission's Committee on Medical Care carefully explored the problem and proposed that the State provide funds to match local and federal funds, not to exceed one-third of the total cost of the project, making the financing of nursing home construction a three-way proposition. The Commission approved this proposal, and recommends this item to provide State matching funds for the construction of non-profit nursing homes as an initial effort toward alleviating the existing shortage of beds for the chronically ill at a most economical cost per bed. Under the proposal the State is in no way obligated for operating and maintenance expenses.

DEPARTMENT OF MENTAL HYGIENE			

Headquarters

10.03.01.04-1 - Construction of additional ward (approximately 50 beds) to Building for Adult Feeble-minded at Rosewood

\$	40,000	-	-
----	--------	---	---

The Building for Adult Feeble-minded, located at Rosewood State Hospital, was designed for a capacity of 400 beds, as part of a colony which is expected to grow to perhaps 1,200 beds. The building provides for the first stage in the abandonment of Old Center Building at

RECOMMENDED 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Agency</u>	<u>Amount</u>	<u>Operation and Maintenance</u>	<u>Additional Staff</u>
---------------	---------------	--	-----------------------------

DEPARTMENT OF MENTAL HYGIENE (Continued)

Headquarters (Continued)

Spring Grove State Hospital. This project provides for adding another ward to this building, providing 50 more beds, which will bring the overall facility up to the total capacity of 400. The design of the building subdivided the structure into eight wards, each a distinct unit within itself except for the necessary ancillary facilities. The original contract only permitted the construction of seven wards, plus utilities and all other ancillary facilities, providing 350 beds. The funds requested will provide for 50 additional beds at a cost of less than \$1,000 per bed, if this project can be undertaken before the original contract is completed. The Planning Commission recommends the project in order that needed capacity can be obtained for the minimum outlay per bed indicated.

Institute for Criminally Insane:

10.03.01.04-5A - Construction of Clinical Director's residence (no furnishings to be provided)

\$ 23,000 - -

Construction of staff housing for sixteen (16) employees, consisting of four, 2-bedroom apartments and dormitory accommodations (single occupancy rooms) for twelve employees (no furnishings to be provided for apartments)

100,000 - -

Extension of utilities to serve staff housing and residence

30,000 - -

Equipment (furnishings) for dormitory accommodations for 12 employees

3,000 - -

The department reported there are no housing accommodations available, either public or privately owned, for the personnel to be employed at the Institute for the Criminally Insane now under construction. The Planning Commission recognizes the fact that it

THE CONSTITUTION OF THE UNITED STATES OF AMERICA

Article I
Section 1
All legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Institute for Criminally Insane: (Continued)

is essential in this type of institution that certain staff members be available for maximum security needs and emergencies. The Commission made a special study of the housing problem and needs in connection with all staff housing requests submitted this year; and among the findings, it was found that in the Jessup area there is a shortage of housing within the means of lower salaried employees. The housing accommodations proposed are in accord with the findings of the study and the policy adopted as a consequence thereof. (See Chapter V, section on Recommendations and Policies Adopted). The lack of housing for the lower salaried employee and maximum security requirements are the reasons for recommendation of these housing facilities by the Commission.

Total - Headquarters	\$ 196,000	-	-

Crownsville State Hospital

10.03.03.02-4 - Conversion of "B" building kitchen to dining area	\$ 32,400	-	-
---	-----------	---	---

When the new kitchen is completed, it will be possible to convert the kitchen now in "B" building to enlarge the existing cafeteria space. This is recommended by the Planning Commission as an effective use of available space that will relieve the present overcrowding. Existing space is so limited that 3 servings requiring a total of 3 hours per meal are necessary to feed the 1,200 now being served. In addition, the project provides for sanitary facilities for handling garbage and toilet facilities now badly needed.

RECOMMENDED 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Agency</u>	<u>Amount</u>	<u>Operation and Maintenance</u>	<u>Additional Staff</u>
---------------	---------------	--	-----------------------------

DEPARTMENT OF MENTAL HYGIENE (Continued)

Crownsville State Hospital (Continued)

10.03.03.03-12 - Installation of floor covering "A", "B", and Young buildings	\$ 14,100	-	-
---	-----------	---	---

The present floors in these buildings are of concrete which is now porous and cracked and impossible to keep clean and odor-free. The project will provide for proper asphalt or suitable tile covering for floors in corridors and dayrooms of three buildings comprising a total area of 23,400 sq.ft. In the interest of cleanliness and efficiency of operation, the Planning Commission recommends this project.

10.03.03.05-1A - Construction of rehabilitation building, including site improvements and utilities (no equipment required)	75,000	-	-
---	--------	---	---

The hospital has approximately \$80,000 in surplus funds available which it is proposed be supplemented by the funds recommended to enable the institution to construct a much needed rehabilitation building. The structure will be similar in layout to existing buildings for this purpose and will provide space for industrial, recreational, and occupational therapy programs. The project is recommended by the Planning Commission in the interest of providing needed rehabilitation facilities to serve a large portion of the institutional population of 2,000 who are housed in the older buildings which do not have any such facilities, and improving the effectiveness of treatment.

10.03.03.03-1B - Site improvements, grading, drainage, sidewalks, roads and parking areas	53,500	-	-
---	--------	---	---

These needed improvements, occasioned primarily by the new construction which

DEPARTMENT OF MENTAL HYGIENE (Continued)

Eastern Shore State Hospital

10.03.04.04-1 - Planning and preparation of design, plans and specifications for a geriatrics building (200 beds)

\$ 14,000 - -

The proposal for this building is for a one-story brick structure, approximately 554,000 cubic feet, with two hundred bed capacity, one hundred each of male and female. As stated by the Department present capacity is 430 and average population for 1956 is 662. More than 40 per cent of the patients are 65 years of age or older. The Committee on Medical Care approves the project, and the Commission recommends advance planning money to permit the planning and preparation of preliminary design.

10.03.04.03-16 - Sanitary, safety and utility improvements

44,800 - -

This project provides for new sanitary sewer line, mechanical improvements, and electrical service line to sewage pumping station; parking lots, storm drains, grading at Administration building and access roads to Carey and Nice Buildings; raising the existing entrance road and increasing width; loading platform main kitchen; and installing electric elevators, main kitchen and Nice Building.

These items are all needed improvements to the institution. Some relieve existing unsatisfactory and dangerous conditions, others make for improved convenience and efficiency. The Planning Commission recommends them as improving operations and increasing the effectiveness and value of the institution.

Spring Grove State Hospital

10.03.07.04-2 - Planning and preparation of design, plans and specifications for active treatment building

\$ 14,000 \$ - \$ -

This project, submitted in previous programs as "Disturbed Men's Building" is planned to provide for one hundred beds in a one-story brick structure approximately 290'x315'. The structure is expected to be similar to the building used for active treatment female patients. This building will also serve as a stage in advancing the elimination of Old Center Building. The Commission recommends the advance planning money in order to get the project underway.

RECOMMENDED 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Agency</u>	<u>Amount</u>	<u>Operation and Maintenance</u>	<u>Additional Staff</u>
DEPARTMENT OF MENTAL HYGIENE (Continued)			
<u>Spring Grove State Hospital (Continued)</u>			
10.03.07.05-8 - Construction of rehabilitation building, including site improvements and utilities	\$ 150,000	\$ 2,500	\$ 4,900
Equipment for rehabilitation building	15,700	-	-
<p>This project is for a structure about 104,000 cubic feet capacity to house industrial, musical, recreational therapy and library facilities. The estimated project cost includes site improvements and utilities. The previous rehabilitation building was condemned as a fire hazard and equipment and facilities have been crowded into temporary quarters resulting in inefficient operation and poor supervision. The Planning Commission recommends the project to relieve the existing temporary condition and improve the effectiveness of the treatment.</p>			
10.03.07.01-21 - Planning and preparation of design, plans and specifications for administration building	1,500	-	-
<p>The project provides for a brick structure of 85,000 cubic feet with facilities for all administrative offices, conference and mail rooms. It will permit the removal of offices from the Foster Wade Building and Old Center. The space made available in the Foster Wade Building can, with only minor renovations, be converted to provide beds for fifty patients. The Planning Commission recommends the preliminary planning money as the first stage in this project.</p>			
Total - Spring Grove State Hospital	\$ 181,200	\$ 2,500	\$ 4,900
TOTAL - DEPARTMENT OF MENTAL HYGIENE	\$ 956,000	\$ 2,625	\$ 4,900

---------------	---------------	--	-----------------------------

STATE DEPARTMENT OF PUBLIC WELFARE

Headquarters

11.01.07.02-1 - Equipment for Children's Study Center

\$ 25,000 - -

The project for the Children's Study Center was recommended last year and approved by the Legislature which deferred the appropriation for equipment to the current program. Since the Study Center is expected to be in operation during the last quarter of 1958, this item for equipment is included in the projects recommended in order that it will be available at the proper time.

Total - Headquarters

\$ 25,000 - -

Barrett School for Girls

11.01.02.01-1 - Construction of superintendent's residence including utilities (no equipment required)

\$ 23,000 - -

This is a project to provide a house for the superintendent to replace the existing building which is inadequate for its present purpose. The house to be vacated can, with some repair, be utilized by some of the school personnel now living in a condemned farm building. The Commission recommends the item.

11.01.02.04-2 - Site improvements, landscaping, construction of sidewalks, roads, lighting and parking areas

18,200 - -

This project provides \$5,000 for landscaping in keeping with the plan of the Department of Public Improvements. The remaining funds will be devoted to sidewalks, road improvements, a parking area, drainage facilities, and roadway lighting. The Planning Commission recommends this item since Barrett School has never been adequately provided with the improvements proposed.

RECOMMENDED 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Agency</u>	<u>Amount</u>	<u>Operation and Maintenance</u>	<u>Additional Staff</u>
---------------	---------------	--	-----------------------------

STATE DEPARTMENT OF PUBLIC WELFARE (Continued)

Barrett School for Girls (Continued)

11.01.02.04-3 - Conversion of 3rd floor,
East and West Cottages to apartments

\$ 8,500 - -

This project will utilize existing space for conversion into staff apartments. One floor is being utilized as an apartment, although it is unfinished; the other floor now accommodates the infirmary, which is being moved. The Planning Commission, recognizing that a number of the employees must live on the grounds from the standpoint of essential operation, recommends this use of building space which cannot be put to any other use comparable in value.

Total - Barrett School for Girls

\$ 49,700 - -

Boys' Village of Maryland

11.01.03.04-1 - Construction of staff
dormitory accommodations for forty-eight
(48) employees (male and female)

\$ 240,000 - -

Extension of utilities, grading and drainage to serve staff dormitory and new
administration building

30,000 - -

Equipment for dormitory accommodations

12,000 - -

This project provides for a building to house 48 employees divided into two sections (one side for males and the other for females) with separate entrances. The single staff members to be assigned to the proposed unit are now housed very unsatisfactorily in the 83-year old deteriorated administration building which is to be razed as soon as the staff living quarters are replaced. The Commission recommends the project in the interest of safety and improved living conditions.

GENERAL INSTRUCTIONS TO THE JURY

Attention is called to the fact that the jury should not discuss the case with anyone outside the jury room.

The jury should not discuss the case with anyone outside the jury room.

RECOMMENDED 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Agency</u>	<u>Amount</u>	<u>Operation and Maintenance</u>	<u>Additional Staff</u>
---------------	---------------	--	-----------------------------

STATE DEPARTMENT OF PUBLIC WELFARE (Continued)

Boys' Village of Maryland (Continued)

11.01.03.04-1A - Site improvements, roads, walks, sidewalks, and drainage	\$ 50,000	-	-
--	-----------	---	---

These funds, proposed by the Department of Public Improvements, are recommended by the Commission to provide for essential site improvements at the institution which have not been provided for previously in other construction appropriations and which will improve the operation and appearance of the training school.

11.01.03.01-1B - To supplement the appropriation "Construction of administration building" for Boys' Village of Maryland shown on page 414 of the Acts of 1955; Section 7 of Chapter 266 of the Acts of 1955 being hereby repealed to the extent that work on said administration building may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose	25,000	-	-
---	--------	---	---

Bids received on this project were in excess of available funds appropriated in the 1955 General Construction Loan. Further reduction in size of structure is infeasible if building is to function properly, and the Commission recommends these additional funds so that the project can be undertaken and completed.

11.01.03.06-2 - Planning and preparation of design, plans and specifications for academic classroom building	3,500	-	-
--	-------	---	---

This project is for an academic building containing classrooms, offices, storage, meeting rooms, etc. Boys' Village has never been provided with a

STATE DEPARTMENT OF PUBLIC WELFARE (Continued)

Boys' Village of Maryland (Continued)

proper educational building and present facilities are scattered among a number of the buildings. The Planning Commission recommends this first stage in meeting the responsibility of the State in furnishing adequate educational opportunities to the boys assigned to this institution.

11.01.03.05-3 - Construction of security annex

\$ 7,200 - -

This project will provide for four isolation rooms, with bathroom facilities, dispensary and nurse's station, as an addition to the present hospital building. Rooms are approximately 7'x9' with security doors, etc. The institution has been criticized for not having adequate security facilities and for being required to use jail facilities in Upper Marlborough. To relieve this condition and to protect the immediate community near the school, the Planning Commission recommends the project.

Total - Boys' Village of Maryland

\$ 367,700 - -

Maryland Training School for Boys

11.01.04.04-1 - Renovations and improvements in electrical and sanitary facilities and floor in Charles Cottage

\$ 8,000 - -

The request as submitted was for renovations in Charles and Kent cottage at \$57,000, of which all but \$7,000 was for work in Kent Cottage. The Commission felt that the proposed work at Kent Cottage represented a major reconstruction job at cost greater than it could recommend and proposed that the project be studied to ascertain whether or not a better alternative

could be found. The work at Charles Cottage, which replaces flooring, tiling, plumbing and electrical facilities in the basement of this cottage is recommended as improving operating conditions at an acceptable cost.

11.01.04.06-2 - Alterations and improvements at Gary Hall to provide classrooms, offices and sanitary facilities for vocational training

\$ 70,000 - -

This project will utilize space in the east wing made available by the opening of the new service building and transfer of garment repair and other activities. The space will provide for three classrooms for vocational training needs, offices and toilets. This project has been recommended by various educational authorities. The Planning Commission recommends it as enabling the school to develop a more adequate vocational training program.

11.01.04.07-4 - Tractor shed, training project

5,000 - -

This project provides for the cost of materials. The work is done by the boys at the school under the supervision of the staff. The Planning Commission recommends the project as an excellent means of training as well as obtaining a useful facility at minimum cost.

Total - Maryland Training School for Boys \$ 83,000 - -

Montrose School for Girls

11.01.04.01-2 - Construction of addition to Field Building (school) for vocational

DEPARTMENT OF CORRECTION (Continued)

Headquarters (Continued)

central laundry to be operated by the Department of Correction. That department would provide a complete linen service to each of the mental hospitals named, plus the new Colony for the Adult Feeble-minded to be constructed at Rosewood.

This consolidation and performance of laundry work by the Department of Correction for another department is similar to past procedure, e.g. the University Hospital laundry is done at the House of Correction. Available patient workers are decreasing, and considerable economies can be effected through the consolidation proposed. A savings of about \$100,000 per year is estimated. For these reasons, plus the valuable vocational training that will be afforded prisoners, the Planning Commission recommends the provision of advance planning money for this project.

Total - Headquarters

\$ 10,000

-

-

Patuxent Institution

12.01.02.05-1A - Construction of Diagnostic Center

\$2,255,000

-

-

The Diagnostic Center represents the second major stage in the development of this institution, and it is the key facility, forming the core around which the entire specialized treatment contemplated at this institution is fabricated. Advance planning funds were provided last year for the development of preliminary plans which have been completed. The Commission approves this project as the most essential step toward completing the development plan, and enabling the adequate functioning of the institution.

Total - Patuxent Institution

<u>Agency</u>	<u>Operation and Additional</u>		
	<u>Amount</u>	<u>Maintenance</u>	<u>Staff</u>

DEPARTMENT OF CORRECTION (Continued)

Maryland House of Correction

12.01.03.02-1 - Construction of staff housing for twenty (20) employees, consisting of fourteen (14), 3-bedroom and six (6), 2-bedroom group houses (no furnishings to be provided)	\$ 246,000	-	-
Extension of utilities to serve group houses	30,000	-	-
12.01.03.02-2 - Construction of staff dormitory accommodations (single occupancy rooms) for twenty (20) employees	108,000	-	-
Extension of utilities for staff dormitory	10,000	-	-
Equipment (furnishings) for dormitory accommodations for twenty (20) employees	5,000	-	-

The Commission recognizes that it is essential in the interest of maximum security requirements in a penal institution to have an adequate number of custodial officers live on the grounds. The department reported, furthermore, that it has been unable to fill vacancies for custodial employees due to an area shortage of housing at rental rates or monthly housing purchase costs consistent with the prevailing salary schedule for such employees. The Commission's special study of the housing problem and needs corroborated the housing shortage in the Jessup area in relation to lower salaried employees. It should be further noted that from about one-third to one-half of the housing accommodations proposed are to be assigned to custodial employees at the Patuxent Institution. The Planning Commission recommends these housing facilities, which will serve both institutions, on this basis.

12.01.03.02-3 - Battery operated lighting system for cell areas and Central Hall	3,000	-	-
--	-------	---	---

The project provides for an emergency lighting system in the cell areas and

$$\frac{1}{\rho} \left(\frac{\partial \rho}{\partial t} + \nabla \cdot (\rho \mathbf{v}) \right) = - \frac{1}{\rho} \nabla \cdot (\rho \mathbf{v})$$

Maryland House of Correction (Continued)

Central Hall for which there is no provision at present. In the interest of enhanced safety of prison staff and improved operations in an emergency situation, the Planning Commission recommends the project.

12.01.03.04-4 - Road improvements, surfacing	\$ 18,000	\$ 100	-
---	-----------	--------	---

The project provides for improving and surfacing the present unpaved institutional roads which are badly worn by the increased traffic of more and heavier vehicles. It will include the road from the laundry to the Annapolis Junction Road, the roads surrounding the dairy barns and several employees' homes, and the road extending to the Cannery. The Commission recommends the project as improving operational facilities

Total - Maryland House of Correction	\$ 420,000	\$ 100	-
--------------------------------------	------------	--------	---

Maryland Penitentiary

12.01.04.01-1 - Acquisition of property to expand existing site	\$ 500,000	-	-
--	------------	---	---

The Maryland Penitentiary is located in a thickly settled area and is completely hemmed in on all sides. The population of the institution is over 1,600, the designated capacity is 1,200. As a result, the overcrowding has created a serious problem of administration. The open space available for exercise of 125'x165', which is completely inadequate for the population housed. Other buildings and facilities will inevitably be required as the population increases. In order that this problem may be met, the Planning Commission recommends the acquisition of the land bounded by Greenmount Avenue, Madison Street, Forrest Street, and Eager Street. These blocks are

12.01.05.02-1 - Construction of Pre-Parole camp (100 beds) Equipment for Pre-Parole camp	\$ 120,000 20,000	\$ 4,000 -	\$23,800 -
The project is located near the east boundary of the institutional property. It provides for a concrete block, barracks-type main building, floor area 9,700 square feet, with basement for heating plant, 512 square feet. The building will serve to separate the prospective parolees from the general institutional population and permit a program to be initiated that will help the inmate adjust to a more normal mode of life. The Department of Parole and Probation will assist in the program. The Commission recommends the project as an improvement in present operational procedure.			
12.01.05.04-3 - Road improvements, surfacing	6,500	50	-
World War II prevented the completion of some of the primary road system, and for years only the base course has been available in many places. These unfinished sections are dirty, dusty and unsightly, but at the same time, are a part of the most traveled roads of the entire institution. The Commission recommends the project as an improvement essential to the institution.

12.01.06.02-1 - Construction of psychiatric unit (40 beds)	\$ 320,000	\$ 700	\$ 18,000
Equipment for psychiatric unit	10,000	-	-

This project is necessary as a result of the increased number of women who are extreme behavior problems. It will furnish for the women a similar kind of service as the Patuxent Institution will supply the men, and will also provide "isolation" rooms for disciplinary cases. The professional staff from the Patuxent Institution will be used for professional services to this unit. The Commission recommends it as providing a place of maximum security for those requiring it and furnishing essential psychiatric treatment.

Total - Maryland State Reformatory for Women	\$ 330,000	\$ 700	\$ 18,000
TOTAL - DEPARTMENT OF CORRECTION	\$3,661,500	\$ 4,850	\$ 41,800

MARYLAND STATE SCHOOL FOR THE DEAF

13.01.00.00-3 - Rewiring and modernization of lighting in Main, Academic and Vocational Buildings	\$ 35,000	-	-
---	-----------	---	---

This project provides for the complete rewiring and modernization of the lighting systems in three major buildings, Main, Academic and Vocational. The Planning Commission recommends the project to replace the antiquated and unsafe lighting, which will result in greatly improved conditions for the children.

13.01.00.00-4 - Equipment for print shop	6,600	-	-
--	-------	---	---

This project provides for the replacement of outmoded equipment (paper cutter and galley proof press) and the purchase of an imposing table for vocational training needs. The Commission recommends the project.

students in temporary buildings that are totally inadequate and that should be demolished. The provision of these dormitory facilities will help alleviate the conditions. The estimated unit cost of \$2,500 per student capacity is derived from recent experience. It is planned to adapt existing plans for the buildings. The Planning Commission recommends the project as necessary to meet the demand for dormitory accommodations.

13.05.02.01-5 - Initial book stacks, including installation and relocating present stacks, new library

\$ 320,000

-

-

This project was requested as an additional item at the 1956 Legislative Session but was deferred as the library building would not be completed, and since the item could be purchased at a later date, it was felt that it could be considered at the 1957 Session. It is now expected that the structure will be completed in July 1957. The Planning Commission recommends the item, which provides for the installation of the initial book stacks required plus transferring the existing stacks to the new library, as essential to the use of the facility now being built.

13.05.02.01-5A - Equipment for library

275,000

-

-

The Planning Commission recommends this project to adequately equip and furnish the new library in order that the building may be put into use for the fall term of 1957. The items making up the cost were examined and approved by the Department of Budget and Procurement

CHAPTER VII

APPENDIXES

In order to provide a full understanding of the Commission's program, four important appendixes and a supplement to this report have been compiled. Appendixes I, II, III, and IV are included herein. The supplement to the report is published as a separate document.

Appendix I comprises a series of charts depicting the trend of institutional population since 1950 for the institutions in the Departments of Mental Hygiene, Health, Welfare and Correction.

Appendix II presents information and instructions concerning the preparation of agency project requests, which material was prepared to assist the State agencies in the submittal of their project requests. Effort was made to further delineate the definition of a capital improvement, long-range development plans were requested, and detailed instructions were given as to filling in the forms.

Appendix III presents a list of the projects submitted which were designated as "urgent" by the various agencies, but which were deferred by the Commission for consideration in connection with next year's program. The reasons for deferral are also presented.

Appendix IV itemizes the projects submitted by the State agencies for consideration subsequent to the current capital improvement program. This listing presents a picture of the future capital improvement needs as the agencies see them at the present time. As the proposed projects are periodically reviewed, there will, of course, be additions to the compilation and a reassignment of priorities as changing conditions may dictate. However, the program for next year will largely be derived from the projects included in Appendixes III and IV.

The Supplement to the report, published as a separate document, contains the preliminary plans and project data for construction projects for which funds are being requested in the current program. This is in accordance with legislation enacted during the 1956 Session (Chapter 121, Laws of Maryland 1956) which requires that at the time an appropriation of funds is requested for a permanent or long-time construction project, there shall be submitted preliminary plans and outline specifications therefor.

May 1956

MARYLAND STATE PLANNING COMMISSION
LONG-TERM CAPITAL IMPROVEMENT PROGRAM

GENERAL INFORMATION CONCERNING PREPARATION OF AGENCY PROJECT REQUESTS

Adequate planning is a basic responsibility of every effectively administered governmental agency. The head of a State department, as manager and as advisor to the chief executive, should establish objectives, foresee emerging problems and plan how to cope with them. With the help of his staff he should determine current and future needs and should develop plans and programs to meet the problems and needs.

Such planning is a continuing departmental function. It enables the department head to maintain a general development program for the agency extending several years into the future. This, in turn, provides the basis for an understanding and evaluation of the physical needs of the department by the Planning Commission and the Governor in their task of coordinating the various departmental programs in terms of total State needs and resources.

PROJECT REQUESTS:

1. All proposed capital improvement projects of State agencies, by law, must be submitted to the Planning Commission for recommendation. To enable proper consideration and evaluation of proposed improvements, each agency should submit a concise statement setting forth pertinent facts as to problems and needs, as well as to the over-all program of the agency to which the requested project or projects are related. The statement should give cognizance to such factors as: (1) emerging problems and alternative solutions; (2) population growth; (3) technical advances and their effects on needs; (4) standards, with past and future comparisons; (5) existing and proposed facilities, with data as to their size, capacity, location and use. Specific data should be furnished whenever possible.

2. Form A, Agency Project Request, is provided for filing specific project data. Each project shall be submitted on a separate Form A. Do not consolidate projects of a similar character for several buildings or other facilities.

3. In the case of a new building, furnish complete data as to what the building should provide in way of functions to be served, space requirements and over-all size, and necessary facilities. (Such data will have been well crystallized if a project is urgent).

STATUTORY REQUIREMENTS:

1. All requests for capital improvements must be submitted to the Planning Commission not later than July 1 of each year.

2. The Planning Commission is required to submit its recommended Capital Improvement Program to the State Budget Director by September 15 each year.

3. The General Assembly, during the 1956 Session, enacted legislation requiring that at the time an appropriation is requested for a permanent or long-time construction project, there shall also be submitted to the General Assembly preliminary plans and outline specifications as to the size, type of construction and arrangement of the building or buildings included in the project, and a statement as to the sufficiency of the proposed appropriation to pay the full costs thereof. (House Bill No. 29)

POLICY STATEMENT:

The Senate Finance and the House Ways and Means Committees, during the 1956 Session, adopted a policy statement concerning capital improvements, as follows:

"The committees are firmly of the opinion that such items as picnic tables, minor equipment items and most repair work should be provided for in the operating State budget. It wishes to reiterate its position that the use of bond funds should not include items of a life of less than fifteen years and it believes also that many low cost items whose life may be more than fifteen years should be included in the operating budget. It is very strongly of the opinion that all agencies and institutions should perform day-to-day preventive maintenance and should not allow their plants to become so run down that large amounts of loan money are required to restore them. The committees direct the State Planning Commission, the Department of Public Improvements and the Budget Director to adopt such rules and regulations as to implement these policies.

The committees also deplore the growing practice of department heads who seek to bypass the authority of the Planning Commission by bringing rejected items directly to the committees in an attempt to have them included in the current construction program. Wherever firm bids indicate that previously authorized improvements cannot be made within the sum appropriated for that purpose, the committees will always consider such a deficiency when recommended by the Director of the Department of Public Improvements. The committees do not intend, however, to write in additional items over the opposition of the Planning Commission, the Director of the Department of Public Improvements and the Budget Director."

DEFINITION OF A CAPITAL IMPROVEMENT:

Expenditures for lasting physical assets (land, buildings or other facilities, and durable equipment) are known as capital outlays; and a capital outlay project constitutes what is customarily referred to as a capital improvement.

Strictly speaking, a true capital outlay should be a "value increasing" expenditure, i.e., one that adds to the value of the fixed assets indicated above. Difficulties are often encountered in connection with specific projects, however, in ascertaining whether or not such is the case. It is clear that maintenance and repair projects do not increase the value of capital assets. But projects for alterations, replacements and especially the provision of equipment and furnishings bring up many borderline cases in which the actual result is unclear.

Capital improvements may be financed out of current revenue, by borrowing, or by a combination of the two. When an improvement is financed through borrowing, then payment of the project cost, plus interest, is usually spread over some period of future time through a series of annual payments. It is axiomatic therefore that a capital improvement financed by the issuance of bonds should have a useful life at least equal to the term of the bonds. Otherwise, the public would be compelled to continue to pay for an item or project that had already been used up or was no longer of service. The expected life of the improvement thus serves as the fundamental basis for determining a proper capital project financed by borrowing, and it is the guiding principle which has been established by legislative enactment in Maryland.

Problems are encountered, nevertheless, in satisfactorily determining the expected life of various items, particularly with respect to some types of equipment, furniture and fixtures, and office appliances. Experience has demonstrated the need for further refinement in the area of equipment, notably as to "package" requests for equipment and furnishings for a new facility. These are requests made up of many relatively low-cost items that bulk large in total, such as items necessary to equip and furnish a new hospital, or dining hall and kitchen.

A further differentiation between equipment items that helps make clear those which are properly included for bond issue financing is the distinction between so-called "fixed or built-in" equipment items and "moveable" equipment. The former comprises mechanical, electrical and other general equipment that is attached to the structure proper by some permanent physical connection, including a fixed utility connection such as water or gas. Fixed or built-in equipment is generally of a lasting character and can properly be included as a capital improvement to be financed out of bond funds. Moveable equipment items, however, must be screened.

May 1956

INSTRUCTIONS FOR PREPARING AGENCY PROJECT REQUESTS

General

To assist the various State agencies in making their requests, the following rules have been promulgated:

1. Equipment projects which may be submitted as a capital improvement request, either individually or as one element of a project.
 - a. Mechanical, electrical and other fixed equipment (equipment that is attached to a structure proper by some permanent physical connection, including a fixed utility connection such as gas or water).
 - (1) Such items shall be treated as part of the construction contract and shall be included in the estimated construction cost as indicated in B (1) of Item 12 on Form A.
 - b. Equipment and furnishings (other than fixed equipment indicated above).
 - (1) The estimated cost shall be entered under C of Item 12 on Form A.
 - (2) Agencies must submit a detailed breakdown of each such request, listing the individual items and their estimated costs. (This is necessary to enable the screening of these items by the Department of Budget and Procurement).
 - c. In no case shall equipment items be requested simultaneously in both the capital budget and the operating budget.
2. Do not submit as a capital improvement request:
 - a. Maintenance and repair projects (such as painting, the redecoration of living quarters, the fixing of a cupola, the repair of floors or locks, or similar type of work), either as an individual or combined project for several buildings.
 - b. Items constituting supplies and materials (items which are currently consumed or are of a recurring nature, whether recurring periodically or at infrequent intervals).
3. In the case of a new building, (for purposes of record, not as a capital improvement request) the agency shall also submit a separate listing of initial supplies, with estimated costs, required to put the building into operable condition. (This is necessary to enable the screening of these items by the Department of Budget and Procurement).

4. Improvements to be financed by bonds should be limited to major projects; and projects or items costing less than \$5,000 should be scrutinized carefully to eliminate minor projects that could be financed out of operating funds.

Instructions for Completing Forms

To assist in properly completing the forms, instructions concerning the items thereon, except those which are self-explanatory, follow:

FORM A - AGENCY PROJECT REQUEST

1. Number of copies. Each agency requesting a capital project shall complete an original and six (6) tissue copies of Form A for submittal to the Planning Commission, making seven (7) sets in all. Each such set, preceded by a copy of Form B (Summary), shall be separately bound on the left hand margin.

No project request will be considered unless submitted on these forms. Incomplete forms will be returned to the submitting agency.

2. Item 5. Give project a concise title sufficient to identify it clearly.
3. Item 6. Specify the number of the project, using the operating budget account code number, followed by a dash and the priority number of the project beginning with number 1. For example, 10.03.05.03-1 indicates Health, Hospitals and Mental Hygiene, Department of Mental Hygiene, Rosewood State Training School, Household and Property Services, first project in priority.
4. Item 7. Specify general location of project and, when applicable, attach rough sketch showing site of proposed project in relation to existing facilities.
5. Item 8. Indicate the status of plans and site, using the following code:

PE - Preliminary Estimate	OSC - Outline Specifications
LA - Land Acquired	Completed
PFC - Preliminary Plans Completed	DPC - Detailed Plans Completed
	DSC - Detailed Specifications
	Completed

6. Item 9. Describe project in sufficient detail to indicate clearly what it is; give size, capacity, type of construction or other characteristics, and purpose. If new building give floor space, number of stories, cubic footage, number of rooms, use and capacity.
7. Item 10. Indicate estimated life of project in years before replacement would be necessary.

8. Item 11. Indicate status of utilities required for project, using code indicated.
9. Item 12. (a) Report estimated project costs, showing breakdown into principal components indicated. Estimates should be to the nearest one hundred dollars. In B. (1) include all mechanical, electrical and other fixed equipment that is permanently attached to the structure. Under B. (2) give estimated cost of utilities if any are required to service the site such as water, gas, sewers, power, etc. Show all prior State authorizations, if any; all outside funds available or anticipated; and the amount requested for specific fiscal year.

(b) A request for equipment and furnishings, Item 12.C, must be supported by submittal of a detailed list showing a breakdown of the items with their estimated cost.

(c) In the case of a new building, attach a separate list showing the initial supplies, with their estimated costs, required to put the building into operable condition. Such supplies are not to be requested as a capital improvement project, but the list is needed for record purposes.

(Compliance with requirements (b) and (c) is essential to enable proper assignment of the items by the Department of Budget and Procurement to either the capital or operating budget).
10. Item 13. Indicate whether or not estimated project costs have been checked with the Department of Public Improvements. Each agency shall furnish that department complete details on proposed projects as far in advance as possible to enable accurate cost estimates to be made.
11. Item 14. Estimate the effect of the proposed project on the annual operating budget for the Agency (or subunit) in accordance with the expenditure breakdown indicated. Operating costs are those incurred in using a facility such as fuel, materials and supplies consumed, and short-lived equipment needed to operate the facility. Maintenance includes the expenditures to keep a facility in good working condition such as painting, repairs, maintenance contracts and the like. Staff costs include expenditures for personal services (professional, clerical, custodial, etc.) to operate the facility.
12. Item 15. Justification of the project is of prime importance. In this section describe: (1) the present situation; (2) the need for the proposed project; (3) alternative solutions, if any; (4) effect of proposed project on over-all program; and (5) relationship to other facilities. Relate need to existing facilities, population statistics, future demand and trends, and make comparisons to existing standards.

Be specific; submit charts and tables when feasible.

Show project revenues, if any; give rates; also specify source of "outside" funds if any are contemplated.

FORM B - SUMMARY OF AGENCY PROJECT REQUESTS

1. Number of copies. Form B is a summary sheet, and all projects requested on the several Forms (A) by each agency or its subunits shall be summarized hereon. An original and six (6) tissue copies of Form B shall be prepared and attached as the cover sheet to each of the seven sets of Agency Project Requests (Form A) submitted.
2. Item 4. (a) Each agency subunit shall list, in order of priority, the projects requested by project number and title from Form A.
For example:

10.03.03.04-1 Construction of medical and surgical building
10.03.03.02-2 Construction of central kitchen
10.03.03.05-3 Remodeling of power plant into rehabilitation building

(b) To facilitate essential coordination in programming, each major department having subunits shall submit a separate listing of projects (using Form B) giving a departmental priority for projects requested by their respective subunits.

APPENDIX III

PROJECTS SUBMITTED AS "URGENT" BUT NOT INCLUDED
IN THE RECOMMENDED PROGRAM

Chapter VI consists of the program recommended to the Governor as the 1958 Fiscal Year Capital Improvement Program. In amount, it totals \$13,545,800 and is made up of the projects selected by the Commission from those designated and submitted by the agencies as urgent. The latter amount to \$28,864,397.

Once again the Commission has recommended advance planning funds for the development of preliminary plans and outline specifications. Six projects are so identified which have a total preliminary estimated cost of \$3,652,000. (See Table 2 on page 23). Adding this to the amount recommended for the other projects in the program results in a total of \$17,200,000, as the real value of the "urgent" projects represented in the current program. This, in dollar value, is about 59 per cent of the estimated cost of all the "urgent" projects submitted.

The conferences held at the institutions and at the Commission hearings quickly established to the acceptance of all that postponement of some projects was unavoidable. Those submitting the programs were very helpful in designating projects which they felt could best be held over for another year as having the least untoward effect on the operation of the agency. The Commission expresses its appreciation of this understanding and cooperation.

The magnitude of the "urgent" projects submitted, in excess of \$28,000,000, was such that some elimination was unavoidable. This, in itself, could be adequate reason why some projects had to be deferred. In many cases, no other reason is needed, and deferment is on basis of priority listed. However, in the following pages the explanation is given for projects which had priorities of relative high order and which were not included in the current program.

PROJECTS DESIGNATED "URGENT" BUT WHICH WERE DEFERRED

DEPARTMENT OF FORESTS AND PARKS

(Total expenditures recommended - \$652,500)

The program of this department, by the very nature of its operation, is made up of a large number of relatively low cost projects. To give an itemized explanation why each project not included in the current program was deferred would add unnecessarily to the length of this report. Suffice it to say that the program was discussed item by item with representatives of the department and the final selection was approved as being satisfactory for the continued expansion and development of the department. The largest single item, acquisition of additional land at Assateague Island at an estimated cost of \$100,000 was not included as the Commission felt that before a decision could well be made, it was necessary to have a clearer delineation of policy and program for use and development of the acreage now owned, as well as that proposed for purchase. As it is, the Commission approved projects amounting to \$652,500 out of a total of approximately \$1,100,000.

Assateague Island State Park

Land acquisition	\$ 100,000
Preliminary planning	5,000

Deep Creek Lake State Park

(Expenditures recommended - \$26,000)

Parking area	\$ 7,500
--------------	----------

Elk Neck State Park

(Expenditures recommended - \$8,800)

Land acquisition	\$ 10,000
Park headquarters and residence	19,500
Boating facilities	5,000

Gambrill State Park

(Expenditures recommended - \$18,000)

Land acquisition	\$ 15,000
------------------	-----------

Gathland State Park

Caretaker's house	\$ 15,000
-------------------	-----------

Green Ridge State Forest

Land acquisition	\$ 25,000
------------------	-----------

Patuxent State Park (proposed)

Land acquisition	\$ 25,000
------------------	-----------

Pen Mar State Park

Sanitary facilities	\$ 10,000
Water supply system	7,500

Principio Furnace Historic Reserve (proposed)

Land acquisition and planning	\$ 5,000
-------------------------------	----------

THE HISTORY OF THE UNITED STATES

OF THE UNITED STATES OF AMERICA
FROM 1776 TO 1876

The history of the United States is a story of growth and development. It begins with the first settlers who came to the New World in search of a better life. They found a land of opportunity, but also a land of conflict. The struggle for independence was a long and hard one, but it was worth it. The United States was born, and it grew. It became a nation of freedom and democracy, a nation that stood for the rights of all people. It was a nation that was built on the foundation of the American Dream.

DEPARTMENT OF FORESTS AND PARKS (Continued)

Rocks State Park

(Expenditures recommended - \$15,000)

Land acquisition	\$ 25,000
Headquarters, shop and storage building	16,500

Savage River State Forest

(Expenditures recommended - \$16,200)

Land acquisition	\$ 15,000
------------------	-----------

Big Run Recreation Area:

Assistant superintendent's residence	17,000
--------------------------------------	--------

Seneca Creek State Park

(Expenditures recommended - \$12,500)

Land acquisition	\$ 60,000
------------------	-----------

South Mountain-Washington Monument State Park

(Expenditures recommended - \$100,000)

Land acquisition	\$ 3,000
Camping area	4,600

Susquehanna Park (proposed)

Preliminary planning	\$ 4,000
----------------------	----------

Wills Mountain Historic Reserve

Land acquisition and preliminary planning	\$ 24,000
---	-----------

Wye Mills State Park (proposed)

Land acquisition	\$ 27,000
------------------	-----------

DEPARTMENT OF MENTAL HYGIENE

(Total expenditures recommended - \$956,000)

Crownsville State Hospital

(Expenditures recommended - \$265,000)

Building for treatment of continued care patients at a preliminary estimated cost of \$1,931,400. Money for advance planning was approved in last year's program in the amount of \$20,000. Problems involved in establishing details and in firming up functional needs and program delayed the preparation of preliminary plans and specifications, so that it will not be possible to include the project in the current program. This leaves an estimated amount required to cover cost of this project

	\$1,911,400
--	-------------

Unit heaters	21,000
--------------	--------

This item deferred on basis of relative importance in list of priorities and as not having adverse effect upon operations.

Eastern Shore State Hospital

(Expenditures recommended - \$133,800)

Geriatrics building with furnishings, \$1,022,300. The Commission approved \$14,000 to cover the cost of planning and preparation of design, plans and specifications for this building. This leaves an estimated balance required of

	\$1,008,300
--	-------------

DEPARTMENT OF MENTAL HYGIENE (Continued)

Rosewood State Training School

(Expenditures recommended - \$40,000)

Dietary improvements	\$ 83,400
Additions to Rogers Diet Kitchen	25,500
Alterations and improvements to patients buildings	123,900
Security fence	127,400

This institution has at present work underway to an amount of \$700,000 and additional funds in excess of \$100,000 available for further projects. Those projects listed were given a lower priority than some others and in the opinion of the Commission may be deferred without undue hardship.

Springfield State Hospital

(Expenditures recommended - \$140,000)

Addition to geriatrics building	\$1,104,700
---------------------------------	-------------

The institution has just placed under construction a building for geriatrics. This project would provide for an addition before the present building is more than started. Under the circumstances, the Commission feels that this project can be deferred.

Expansion of power house utilities	589,700
------------------------------------	---------

Present power facilities are to be supplemented by a tie-in with private power sources to provide for emergency service and additional power needs. This project is deferred until such time as further experience and studies indicate the need for further expansion of the institution's power plant.

Spring Grove State Hospital

(Expenditures recommended - \$181,200)

Active treatment building estimated at \$1,077,200. The Commission approved \$14,000 to cover the cost of planning and preparation of design plans and specifications for this building. This leaves an estimated balance required of	\$1,063,200
---	-------------

Administration building estimated at \$105,600. The Commission approved \$1,500 to cover the cost of planning and preparation of design plans and specifications for this building. This leaves an estimated balance required of	104,100
--	---------

STATE DEPARTMENT OF PUBLIC WELFARE

(Total expenditures recommended - \$645,400)

Barrett School for Girls

(Expenditures recommended - \$49,700)

Conversion of third floor, staff cottage	\$ 12,000
--	-----------

Two projects were submitted which provided for conversion of existing facilities. The Commission recommended one of the projects in the current program. The second project was deferred for further study following conferences with departmental representatives.

STATE DEPARTMENT OF PUBLIC WELFARE (Continued)

Barrett School for Girls (Continued)

Alterations to storeroom \$ 9,300

Inspection of this proposal indicated that the project necessitated further study. The amount requested did not seem adequate to achieve results desired. The present condition has existed since the building was completed. While a change seems in order, it is not of immediate urgency.

Boys' Village of Maryland

(Expenditures recommended - \$367,700)

Academic classroom building at an estimated cost of \$260,000.

The Commission approved \$3,500 to cover the cost of planning and preparation of design plans and specifications for this building. This leaves an estimated balance required of \$ 256,500

Montrose School for Girls

(Expenditures recommended - \$120,000)

Conversion of first floor of Gardner Building to administration offices \$ 15,000

This project provides for the conversion of existing vocational classrooms into administrative offices. While the Commission approves this project, it cannot be undertaken until new vocational classrooms are available. An addition to the Field Building (school) to provide these classrooms is included in the current recommended program. This project, therefore, is deferred until next year.

STATE DEPARTMENT OF CORRECTION

(Total expenditures recommended - \$3,661,500)

Headquarters

(Expenditures recommended - \$10,000)

Construction of Central Laundry at an estimated cost of \$900,000. The Commission approved \$10,000 to cover the cost of planning and preparation of design plans and specifications for this building. This leaves an estimated balance of \$ 890,000

Patuxent Institution

(Expenditures recommended - \$2,255,000)

Additional boiler \$ 140,000

While the time will come when additional boiler capacity will be required, the Commission, upon the advice of the Department of Public Improvements, deferred this project since existing facilities are adequate to meet the demand for the immediate future.

Maryland House of Correction

(Expenditures recommended - \$420,000)

Additional land for farming \$ 30,000

The institution already has \$20,000 available and no specific proposal for consideration.

STATE DEPARTMENT OF CORRECTION (Continued)

Maryland Penitentiary

(Expenditures recommended - \$500,000)

Grade and pave roads	\$ 25,000
----------------------	-----------

This institution is preparing to embark on a program of expansion. With the securing of additional land, complete development plans can be prepared. The Commission feels that expenditure can wisely be deferred until the improvement can be related to future plans.

Maryland State Reformatory for Women

(Expenditures recommended - \$330,000)

Vocational building	\$ 65,500
---------------------	-----------

In view of the magnitude of the construction funds already recommended for this institution and the department, the Commission believes that the proposed project should be deferred until a subsequent program. It feels this can be done without harm to the operation of the institution.

MARYLAND STATE SCHOOL FOR THE DEAF

(Total expenditures recommended - \$47,600)

Architectural and technical fees for proposed primary building	\$ 25,000
--	-----------

This project which would provide additional accommodations for students is based on a change in policy of operation rather than any current shortage of facilities. The Commission feels that in view of the capital expenditures involved, the proposed change in policy requires extensive study before a decision can be reached.

MORGAN STATE COLLEGE

(Total expenditures recommended - \$1,364,900)

Equipment for Auditorium, Music-Arts Building	\$ 109,900
---	------------

The building for which this equipment is intended will not be completed before another Capital Improvement Program is in effect. Because of this, the Commission has deferred the project.

President's residence	40,000
Campus development	105,000

These items were not included in the recommended program since in the opinion of the Commission, their deferment in favor of other projects will be of more value to the institution.

Administration building	345,000
Stadium construction	35,000

The Commission does not feel that the relative urgency of these projects justifies their inclusion at this time.

Staff residences for dean of men, dean of women and superintendent of buildings and grounds	56,000
---	--------

The Commission is not convinced that these facilities are of impelling need. There are possibilities of housing within a mile of the college.

STATE DEPARTMENT OF EDUCATION

(Total expenditures recommended - \$1,705,000)

Bowie State Teachers College

(Expenditures recommended - \$315,000)

Equipment for library \$ 46,000

The time required to complete the construction of the new library for which funds have been recommended is of such length that another Capital Improvement Program will be acted upon before the equipment will be needed.

Construction of laboratory school 462,000

The Commission felt that in view of the magnitude of the program this item which had a lower priority than many could be deferred without undue hardship.

Frostburg State Teachers College

(Expenditures recommended - \$719,000)

Land and properties \$ 130,000

The Commission feels that the project can be deferred without materially affecting the program of the institution.

Salisbury State Teachers College

(Expenditures recommended - \$16,000)

Acquisition of land \$ 150,000

The Commission feels that a proper land use program or site plan for the property now owned would disclose that no additional land is necessary.

Remodeling of old library 70,000

The Commission feels that this project can be deferred without working any hardship on the institution.

Construction of gymnasium, estimated to cost \$400,000.

The Commission approved \$6,000 to cover the cost of planning and preparation of design plans and specifications for this building. This leaves an estimated balance required of

394,000

Towson State Teachers College

(Expenditures recommended - \$112,000)

Laboratory school \$ 743,000

Equipment for laboratory school 30,000

Funds for advance planning of this project were provided in the 1956 General Construction Loan. However, owing to the fact that the college has been unable to acquire the site on which this facility is planned to be constructed, it has been impossible to develop details of layout and design and the preliminary plans will not be available in time as required by law. Consequently, it has been necessary to defer the project, which, of course, applies to the equipment item.

STATE DEPARTMENT OF EDUCATION (Continued)

Towson State Teachers College (Continued)

Construction of physical education facilities	\$ 100,000
Construction of service building	160,000
Construction of roads and parking areas	65,000
Addition to power plant	175,000
Construction of additional gymnasium facilities	595,000
Construction of women's residence hall	555,000

The above items were given a lower priority than those already approved for the Department of Education. In order that the magnitude of the recommended program may be kept within reasonable limits, the projects are deferred at this time.

Coppin State Teachers College

(Expenditures recommended - \$543,000)

Equipment for gymnasium-classroom building	\$ 25,000
Construction of chain link fence	16,000

The equipment for the gymnasium-classroom building will not be needed before another Capital Improvement Program is in effect; and the fence project was not included since it is felt it is not essential to the operation of the school.

UNIVERSITY OF MARYLAND

(Total expenditures recommended - \$3,936,800)

College Park

(Expenditures recommended - \$3,611,800)

Equipment for College of Business and Classroom building	\$ 120,000
--	------------

This item will not be required until the building has been constructed. The time to accomplish this is of such duration that another Capital Improvement Program will be in effect and the equipment will then be recommended.

Purchase of land \$94,000. The Commission approved \$3,000 for the purchase of land for the most urgent need, a new outlet road on the south side of campus. This leaves an estimated balance in this project of 91,000

The projects at College Park classified as urgent by the University totaled \$3,993,134. The Commission recommended about 90 per cent of this amount. The remaining projects in the opinion of the Commission can be deferred without undue hardship in the institution. The projects will receive consideration in the next program at which time some will undoubtedly be recommended. The projects deferred at this time are:

Planning funds for animal sciences building	20,000
Roads, walks, landscaping and general utility extension	85,000
Turkey research shelter	23,000
Poultry cage layer house	12,000
Air conditioning (College Park and Baltimore)	100,000
Planning funds for physical sciences lecture halls	11,000
Planning funds for home management and family living center	5,000

UNIVERSITY OF MARYLAND (Continued)

College Park (Continued)

Fencing of campus	\$ 10,000
Zoology animal rooms	19,000
Planning funds for women's field house	8,000
Planning funds for converting present coliseum to University Auditorium	7,000
Machinery and storage shed	10,000
Storage building, plant research farm, Fairland	15,000
Purchase of electric transformer	52,134
Equipment for printing student newspaper	80,000
Access road to stadium	23,000

Baltimore

(Expenditures recommended - \$178,000)

Purchase of land, professional schools, \$524,455. The Commission approved \$11,000 for purchase of property on Lombard Street, which was of first priority. The leaves an estimated balance of	\$ 513,455
Additional elevator for University Hospital	125,000

This project is to provide a sixth elevator in the rotunda of the hospital, the shaft for which has been, and is used, to house certain hospital facilities, which facilities would have to be relocated. It was reported that this additional elevator is needed so that peak loads can be handled. The low priority given this project has been interpreted as indicating the desirability of the project from the standpoint of convenience but not as of immediate urgency. The Commission defers the project on this basis.

The Commission deferred the following items as being less urgent than those approved and in the belief that their postponement will not work an undue hardship on the institution. The projects will receive consideration in next year's program.

Planning funds for out-patient building, School of Medicine and University Hospital	100,000
Planning funds for facilities for School of Dentistry	6,000
Purchase of ground rents	50,000
Underground conduit for telephone service	18,000

APPENDIX IV

PROJECTS SUBMITTED BY THE VARIOUS STATE AGENCIES FOR YEARS
SUBSEQUENT TO THE 1958 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM

<u>Department</u>	<u>Amount</u>
